Multiformity in the Song of Ḫedammu

https://doi.org/10.1515/aofo-2018-0001

Abstract: A new analysis of the narrative tradition of the Hurro-Hittite Song of Ḫedammu is presented, arguing that two separate Hittite versions can be reconstructed, one relatively condensed, the other more prolix. Such multiformity supports the postulation of an oral tradition lying behind the scribal production of Hurro-Hittite narrative song at Ḫattuša.

Keywords: Song of Ḫedammu, oral tradition, multiformity

Siegelová's (1971) edition of CTH 348: *Song of Ḫedammu* was a meticulous attempt to impose order on the confusing array of fragments – both overlapping and discontinuous – of a narrative whose broad outline nevertheless was quite clear, progressing from the marriage between Šertapšuruḫi, the daughter of the Sea, and Kumarbi to the birth and upbringing of the sea-snake Ḫedammu, and ending in the seduction and (presumably) destruction of Ḫedammu through the erotic wiles of Anzili, the Storm-god's sister.[1] Siegelová's edition added appreciably to the number of fragments assigned to the *Song of Ḫedammu* by Laroche (1965; 1968: 169–176), and they served as the basis of the translations by Hoffner (1998: 50–55) and Haas (2006: 153–156), although both of these scholars were careful to make clear to their readers that they were making sense of bits and pieces of a story, rather than simply translating a continuous text. As part of the project "Hethitische mythologische Texte," funded by the Deutsche Forschungsgemeinschaft, Prof. Dr. Rieken and her team at Phillips-Universität Marburg re-examined all the fragments associated with CTH 348, updating Siegelová's foundational edition, re-ordering the fragments and discovering several new joins and duplicates. These were published on the electronic database Konkordanz der hethitischen Keilschrifttafeln (http://www.hethport.uni-wuerzburg.de/hetkonk/, hereafter KhT) in 2009. Since then new joins have been discovered by Dijkstra (2005; 2011 [2015]), Groddek (2001–2002; 2016), and Lorenz (2010: 107) and duly noted on the KhT, but the on-line edition has not yet been reworked to reflect the changes. Meanwhile publications on the *Song of Ḫedammu* have been increasing, explaining the new joins and their implications and examining its place in the larger Syro-Anatolian narrative tradition about a battle between the Storm-god and the forces of chaos represented by the sea or a snake (Ayali-Darshan 2015; Dijkstra 2011). In the summer of 2012 I prepared a translation of the *Song of Ḫedammu* for the handbook *Ancient Mediterranean Myths: Primary Sources from Ancient Greece, Rome, and the Near East* (2013: 144–153), edited by López-Ruiz.[2] In the process of working through the information provided by the KhT I realized that at least two versions of the Hurro-Hittite song

1 Anzili is the Anatolian goddess hiding behind the Akkadogram *IŠTAR*(*-iš*/*-li*) in the Hittite versions of Hurro-Hittite narrative songs (Bachvarova 2013: 25–29; Wilhelm 2010). Dijkstra (2011: 75) dissents from the commonly held view that Ḫedammu is the child of Kumarbi and Šertapšuruḫi. The ideas in this article were presented at the 225th Annual Meeting of the American Oriental Society, New Orleans, La., March 13–16, 2015. Early versions of **Figure 1** and **2** were prepared by Prof. Alexandra Opie working in Photoshop with the photos provided on the Mainzer Photoarchiv, accessed through the KhT. The final versions were prepared by Christopher Gramlich and Martha Fast, based on sketches drawn by me. I thank Dr. Groddek for sharing the manuscript of his latest contribution with me before publication, which greatly improved my understanding of the extant remains of *Song of Ḫedammu*.

2 I have been able to make corrections in the second edition (Bachvarova in: López-Ruiz 2017: 158–167) incorporating information from the recent publications mentioned above. That is the translation provided below, used with the kind permission of Oxford University Press.

existed, which provided an explanation for the overlap, but not exact match, among some fragments. I labeled a relatively briskly moving version of the story "Y." A version that devotes the length of an entire tablet to the scene in which Anzili (*IŠTAR*) seduces Ḫedammu I labeled "X." Here I provide in six tables and three figures the information that led me to this conclusion with a brief discussion of some of the more salient observations to be made about the versions that can be reconstructed.[3] I close with a discussion of the implications of the multiformity that I have uncovered for understanding what exactly the Hurro-Hittite narrative songs preserved for us by scribes represent and some avenues for future research into this unique body of material from the ancient world.

We begin with the fragments of significant size that do not fall within the two sections of the preserved narrative of versions "X" and "Y."[4] **Table 1** provides a conspectus of the fragments that preserve enough text to allow for a continuous translation, but cannot be placed within the trajectory of versions "X" and "Y." Probably the most notable observation to be made about them is that one fragment, labeled here 7.B (ABoT 2.17/KBo 26.109), was found outside of Boğazköy at Kuşsaray 15 km away,[5] perhaps an indication of the great popularity of this narrative among Hittite scribes.

The fragments are too exiguous to draw many conclusions about the overall trajectory of the narrative(s) they represent, but they seem to precede the famous seduction scene in which Anzili reveals her naked limbs on the beach to the sea-monster and intoxicates him with magical potions. The join by Groddek (2016: 142–146) of KUB 33.94 and KUB 8.67 (Fragment 2.A) shows that we have the beginning and end of a single tablet starting with the betrothal of Kumarbi to the daughter of the Sea and closing with the birth and upbringing of Ḫedammu. The tablet does not begin with the standard "I sing/praise…" opening and is described in its colophon as the second tablet (see Groddek 2016: 145–146). It may be that a version of the battle between the Storm-god and the Sea took place in the first tablet of this textualization, explaining why the Sea would be an ally of the Storm-god's rival Kumarbi. Frr 3, 4, and 5 clearly fit within the section of narrative enclosed by the beginning and end of the tablet from which Fr 2.A comes, while Fr 1, providing Kumarbi's motivation for creating a rival to Tarḫun, precedes the section of narrative inscribed on this tablet. Frr 6 and 7, describing the gods' realization that a new and terrifying rival has been created, might best be placed after the description of Ḫedammu's monstrous appetite, but it is not impossible to justify placing them before it.[6] There is some evidence of variation both at the level of scenes and at the level of phraseology among these fragments. Fr 4 describes the securing of an off-site location in Nippur for a secret discussion between the Sea and Kumarbi rather than at their houses, where their meetings take place in the other fragments; it may offer a distinctive version of some section of the narrative.

Turning to the two versions of the *Song of Ḫedammu* that I believe I have uncovered, in Version X, the more prolix version, the seduction of Ḫedammu by Anzili consumes the length of an entire 4-column tablet,[7] as shown in **Tables 2–4** and **Figures 1 and 2**. Exemplar A is preserved in seven disconnected pieces that are extended by parallel passages from four fragments of other tablets. Most of the fragments explicitly discuss activities involving Anzili and Ḫedammu or use phraseology that also appears in the seduction scene of Version Y. Ḫedammu appears in A.3 = KUB 33.85 speaking of his mother, and he may be making a comparison between her and Anzili. **Figures 1 and 2** modify the Joinskizzen of A provided in KhT to take into account the new joins and the space needed to cover the additional material preserved in B, C, and D. The dimensions of the tablet are based on a length to width ratio drawn from Waal's average proportions for a large 2-column New Hittite tablet: length 26.9 cm, width 18.6 cm, equaling a ratio of 1.446 (Waal 2012: 218). (This is a slightly

3 It is interesting to compare these findings with Siegelová's preliminary attempt to sort the fragments into 4 sets based on the size of the handwriting (1971: 36–37). She does group all of X.A together under D, but also includes Y.B and Y.F. Under her A are fragments of Y (A.1, 2, D, E, I) but also X.B. Similarly her B: it includes X.E and Y.G, H.

4 Also see Dijkstra (2005: 322) for his own thoughts on the ordering of the fragments.

5 "It is remarkable that a composition of this kind (a myth of Hurrian origin) was really unearthed outside of Boğazköy" (Akdoğan 2011: 20).

6 See further the discussion of Groddek (2016: 156, n. 69), noting the observation made in KBo 26 that Nos. 79 (my 7.A) and 80 (my 3.A) appear to be copied by the same scribe.

7 Already noticed by Dijkstra (2011: 65).

different ratio than the Joinskizze on KhT, which is 1.346.) The template simply doubles the width of the obverse right side, resulting in a template slightly larger than Waal's average: width 19.5 cm, length 28.2 cm. Note that the process of Photoshopping the fragments to join together in such a way that the obverse and reverse matched up in the layered image required slight distortions to the images in the photos from the Mainzer Photoarchiv we were working with, so these dimensions are not exact and do not perfectly match the dimensions as photographed. **Figure 3** layers the two sides on top of each other to show how the layout of the fragments avoids overlap of separate fragments. Of course, checking the backs of physical fragments might show that some in fact can be connected together. For example, two small fragments (published as KBo 26.75 and KBo 19.110; my X.A.6 and 7) can be placed on A iv, but the photographs provided by the Mainzer Photoarchiv do not allow for further precision. Examination of the backs of these fragments might allow for some further joins or exclude them.

My translation is as follows:

X, § 1^1, B rev.? 1′–6′, A i 1′–4′

[..] s/he did [X]. S/he [...] w[e] (will) step [...] I (will) do [X ...]. I (will) do [Y ...] to Ḫedammu. If Ḫ[edamm]u (obj.) [...], but if Ḫeda[mmu ... m]y si[n].

X, § 2^1, B rev.? 7′–11′, A i 5′–10′

[When ...] finished [speaki]ng, s/he [went] away [...], while [Anzil]i wen[t] into the bath-house. [...] she went in to bathe. She bathed herself [...] she did [X ...], while with sweet fine oil she anointed herself. She [ador]ned [herself], and love was running after her as puppies do.

X, § 3^1, B rev.? 12′–16′, C 1′–5′

[Anzili] began to speak [to Ninatta (and) K]ulitta, ["...] take the [*galgaltu*]*ri*-cymbals. [On] the shore of the sea with the *arkammi*-drum [s]trike [on the right side], and on the [le]ft strik[e] the *galgalturi*-cymbals [...] fo[r] kingship [...]. [I]f perhaps [he] hear[s] our message, we will see [...], when [...].

X, § 4^1, B rev.? 17′–18′

[... Nina]tta [(and)] Kulitta [...]

The fragment breaks off before paragraph end. After a small fragment mentioning Ḫedammu and a head (compare X, § 9^4), I place the following passage, in which Ḫedammu may be discussing his mother with Anzili.

X, § 7^3, A i 19‴–21‴

[...] Ḫedammu ... the Se[a ...] Šertapš[uruḫi ...]

X, § 8^3, A i 22‴–28‴

[...] Ḫedammu [...] began to [... the h]eroic god (obj.) [...] fills [...] s/he did [X]. "My mother [...], but [y]ou [...]

Fragment breaks off before paragraph end. The story continues with songs and attention paid to Hedammu and a seductive baring of breasts.

X, § 9^4, D ii 1–9, A ii 1′–5′

[Anzili] keeps singing [beautif]ul songs. [H]eaven [and] earth [sing song]s [in response ... a]ll of them ke[ep] bowing [...]. The pebbles quak[e] and the *patturis* do [X]. Down for him [...] (her) breast[s ...] Anzili s[ing]s. [...] Ḫedammu [hears] the beautif[ul songs] in the deep waters [... from the] w[ave].

X, § 10^4, D ii 10–15, A ii 6′–10′

When Ḫedammu does [X ...]. Ḫedammu [... raised] his head from the wave. He saw Anzili. Anzili hel[d] up her naked limbs before [Ḫed]ammu.

X, § 11[4], D ii 16–19, A ii 11′–16′

Ḫedammu [began to] spea[k] to Anzili in turn, “Which god are you also? Are you no[t] afraid [...]?” In the sea [...]. [I will] strik[e] for himself [...]. For him lik[e] for an ox. [...] and not [...]

X, § 12[5], A ii 17′′–28′′

[...] everlast[ing ...]. But, black/night [...] they (will) [d]ie. [... s/he] is/will be [a]ngry [...] You will die, you will perish [...] s/he goes/will go [...] they do not/will not do ... [insid]e of the house. [...] The Fate-goddesses, the Great Goddesses [...] likewise did not d[o].

X, § 13[5], A ii 29′′–33′′

Ḫedammu began to speak to [Anz]ili, “You, woman, go [...] far away, I will eat you up! [...] angry. It/them to me [...]

Bottom edge of ii reached.

X, § 14[5], A iii 2′–10′

[...] in the place [...] Nineveh (obj.) [...] people [...] I (will) brin[g]. [...] dried [...] Ḫedammu (subj.) [...]

Fragment breaks off before paragraph end.

X, § 16[6], A iii 12′′–18′′

[Ḫ]edammu [began to] spea[k] words to Anzili, “What woman are you?” Anzili began to speak [in turn] to Ḫed[ammu], “I am an an[gry] young woman. For me foliag[e does X to] the mountains like *šarauwar*.” She says it. Anzili [does] obeisance [...] to Ḫedammu. Him with the speech [...] she intoxicates.

(X, § 17[6], A iii 19′′–27′′)

Ḫedammu [began to] spe[ak] to Anzili, “What woman are you? [Tell me] your name. I [...] say[...] t[hey] say [...” ...] s/he [sa]id [...] “Up [...] run[...] above [...] Anzili [...]

Column iii of A breaks off before paragraph end. D picks up the story after a gap, at the end of its col. iii, roughly equivalent to the upper part of col. iv of A.

X, § 19[7], D iii 1′–14′, A iv 1′–4′, E 1′–3′

[...] For us [... w]e will go [...] and together [... t]o us, the mountains [...] we will sleep [...] soothe [... w]e will [do X]. But [...] of the hazelnut (?) [...] we will do [X]. For us, [o]n our heads a spear (d. o.) [...] For us let the scent of the hazelnut(?) soothe in his penis. In the future the dream will not release us. A spear will leap away from our bodies.

X, § 20[7], A iv 5′–8′, E 5′–9′

Ḫedammu (subj.) [...]. Of the [w]atch [...]

Fragment breaks off before paragraph end.

(X, § 21[8], A iv 9′′–14′′)

[...] we (will) [c]all as witness [... *parnul*]*li* (obj.) fro[m] the powerful [waters ...] Ḫedamm[u ...]

Fragment breaks off before paragraph end.

The join by Dijkstra (2011: 59–65) of KUB 36.95 and KUB 36.56 (here X.D) and the concomitant realization that what are marked as columns ii and iii on the handcopy KUB 36.56 need to be reversed reveal the trajectory of the narrative going from the beginning of ii to the bottom of iii, and therefore allow us to reconstruct the trajectory of the latter part of X.A. The top of D ii corresponds to the middle of A ii; if the handwriting on both tablets were the same size, then the bottom of D iii, where Anzili is still in the process of seducing Ḫedammu,

Brought to you by | Union Presbyterian Seminary

would approximately correspond to the top of A iv. However, the signs inscribed on D are somewhat smaller than those on A, such that six lines of D take the same space lengthwise as five lines of A (ignoring the additional space at paragraph markers). Allowing for the larger handwriting of A means that the bottom of D iii approximately corresponds to the bottom half of A iv. It is possible for the seduction scene to be completed by the end of A iv, and perhaps this version of the story reaches its end, if Anzili was the primary means by which Ḫedammu was vanquished.

In X.A.6 and D the same verb *watkuzzi* 'it/he springs' appears. Its subject in D is a spear; the subject is lost in A. D iii does not provide much connected text, but the combination of UR$_2$-*ši anda* 'in his penis/limb' and 'spear' (ŠU.I-*taran*, GIŠ*šiyattal*) suggests the possibility that Ḫedammu's penis is compared to a spear as Ullikummi's body is in *Song of Ullikummi* (1, § 8′′; 3, § 2′). Note that there is little room for the small fragment X.A.7 if it is placed after A.6, as I have done here somewhat arbitrarily, and if there are no joins on the back faces of any of the fragments assigned to i and iv, as shown by **Figure 3**, in which the obverse and reverse of A are layered over each other. The Joinskizze on KhT places this fragment higher up in col. iv, certainly a possibility. I chose to place it after X.A.6 because I imagine the calling of a witness to roughly match the scenario in Y, § 20^7, A iv 26′–30′ when Ḫedammu beckons Anzili into the water. This occurs in Y after Ḫedammu's uncontrollable erection and ejaculation are described, which in X are described in A.6. That is, I imagine Ḫedammu taking an oath in X.A.7 while he attempts to lure Anzili into the water, as he does in Y, § 20^7.

My version Y is built up out of 9 exemplars. **Table 5** describes the fragments of the 9 tablets and includes the numbering schemes of KhT and Siegelová. The indirect join proposed on KhT *ad loc* of 649/z (KBo 26.72), which only has the obverse preserved, with 392/v (KBo 19.109) + 1361/u (KBo 19.109a) + Bo 6404 + Bo 10295 (KUB 33.84), which only preserve the reverse of the tablet, proves to have major implications for our reconstruction of exemplar A. The piece of i/ii that belongs to the upper portion and the larger piece of iv belonging to A are filled out by fragments of 8 other tablets containing parallel passages to provide a set of 5 passages that tells a fairly succinct version of the story. First Anzili apparently spots Ḫedammu for the first time and is afraid. This matches the scenes in *Song of Ullikummi* 1, §§ 19′′–21′′; 2, §§ 5′′–6′′ when first the Sun, then Anzili and Tarḫun react to seeing Ullikummi. In the next passage Ea scolds Tarḫun and Kumarbi for the damage they do to mankind. Then, Kumarbi arranges a secret meeting with the Sea. The following passage humorously presents the complaints of humans buffeted by the meteorological manifestations of the conflict among the gods. The final scene is Anzili's seduction of Ḫedammu, who is so aroused at the sight of her nakedness that he ejaculates copiously, and his sperm (which I envision as milt) appears to blanket the land.

Y, § 1^1, A i 1′–6′

[...] 3 DANNAS [...] tooth [...] everything [...]

Y, § 2^1, A i 7′–14′, B i 1′–8′

[...] in front of the [X]-s [...] and [...], but [... doe]s [X ... hea]ven and earth [... eve]rything [...], but s/he stepped [...] under the Dark Earth [...]. When s/he arrived under the Dark Earth [... s/he did not eat yet], nor did s/he drink anyth[ing ...]. The wind e[a]ts it, the peg.

Y, § 3^1, B i 9′–14′, A i 15′–18′

[...] up to Enli[l ...] s/he does [not] eat [ye]t, [nor] doe[s] s/he eat [anything ...] no one (subj.). [... tong]ues ... h[uma]nkind [...] under the sea [...] to Ḫedammu [...] he devours.

Y, § 4^1, B i 15′–27′, A i 19′–20′

[...] Anzili [of Nineveh ...] goes [a]way ... the go[d ...] did [X]. The sea [...] does [X ...,] he eats. When the god [...], s/he [began] to speak before his/her mind, ["... . W]hich god from under the sea [..]. The empty cities [...]. While Ḫedammu [...]. But, Anzili [went] f[orth] to the sea [... Ḫedammu] saw Anzili. [Ḫedammu ...]. Heaven upwards [...] "I fear them, the s[nakes ...]."

Exemplars A and B break off before paragraph end. A gap follows before passages from other fragments pick up the narrative.

Y, § 5^2, C ii/iii 1′–7′

[...] b[asalt-]stone [...] off[ering ...] mountains [... so]meone some[thing ... s/he look[s a]t [... spins] like the wheel [of a pot]ter.

Y, § 6^2, D ii 1–8, C ii/iii 8′–16′, E ii 1′–8′

[Ea], king of wisdom, spoke among the gods. [Ea] began to [spe]ak, "Why do y[ou (pl.)] destroy it, [mankind?] They will not give offerings to the gods, and they will not burn cedar incense for us. [A]nd, [if] you destroy mankind, they will no long[er worship] the gods. Also, no one will offer [thick-brea]d (and) libation to us. And, Tarḫun, heroic king of Kummi, will go and grasp the plow [himse]lf. And, Anzili and Ḫebat will go and grind the [grind]stone themselves."

Y, § 7^2, D ii 9–16, C ii/iii 17′–26′

[E]a, king of wisdom, began to speak to Kumarbi, "What is the reason why [y]ou, Kumarbi, purs[ue] mankind for evil? Doesn't mankind make pile(s) of grain, and don't [the]y pr[om]ptly off[er] (it) to you, Kumarbi? Also, inside the temple, in joy, to you alone, Kumarbi, father of the gods, they promptly made offerings. Don't they make offerings to Tarḫun, the canal inspector of ma[nk]ind? And, don't they mention me, Ea the king, by name? [...] you put the wisdom of all after [...] the blood (and) tears of mankind [... K]umarb[i ...]

Both exemplars break off before paragraph end. A gap follows.

Y, § 8^3, F ii 1′–5′, E iii 1′–3′, G iii 1′

Kumarbi tells Mukišanu to convey the following message to the Sea:

[... "... make your way away] under [river] (and) earth. [Let Kušuḫ], Ištanu, [and the gods] of the earth [not see you]. Go up to Kum[arbi] under [river (and) eart]h."

Y, § 9^3, F ii 6′–9′, G iii 2′–4′, E iii 4′′–8′′

[Mukišanu] heard [the wor]ds. He p[romptly stood] up. [He] made his way away under river and earth. Kušuḫ, Ištanu, and the gods of the earth, did [not s]ee him. [He] went down to the Sea.

Y, § 10^3, G iii 5′–16′, F iii 1–8, E iii 10′′′–14′′′, A ii 1′–2′

Mukišanu began to speak in turn the words of Kumarbi to the Sea, "Come, the father of the gods, Kumarbi, calls you, and for which matter he calls you, it is an urgent matter. Come promptly. Come away under river and earth. Let not Kušuḫ, Ištanu, and the gods of the earth see you." When the great Sea heard the words, he stood up promptly, and he w[ent] away down by the path of earth and of river. He completed it at one go. He came up to Kumarbi from below, from the pillar(?), from the earth, to [his] throne. They set a throne for the Sea, for him to sit. The grea[t Sea] sat on his throne. He [s]ets a laid table for him, t[o] eat. And the cup-bearer give[s] him sweet wine to drink. Kumarbi, the father of the gods, and the great Sea [s]i[t]. They eat (and) drink their fill.

Y, § 11^3, G iii 17′–22′, H 1′–5′, A ii 3′–7′

Kumarbi began to [s]peak words to his vizier, "Mukišanu, my vizier, which words I speak to y[ou], hold your ear cocked to my words. Draw shut the doorbo[lt ...], and thro[w to] the (door)-bars [...] in the palace [...] like a [s]cent le[t] him/her/it [not] do [X]. Word[s ...] like a *pušpuši* (obj.) [...] poor men [..."]

Y, § 12^3, H 6′–8′, G iii 23′–24′, A ii 8′–10′

Mukiš[a]nu [heard] the word[s]. He prompt[ly stood ...] he began to [X]. The doo[rb]olt (subj.), the p[eg ... b]ronze withi[n ...]

All passages break off before paragraph end. A gap follows before column iv of exemplar A picks up the narrative.

Y, § 13^4, D iii 1′–7′

[... "...] strikin[g ... . B]ut, the lightni[ng] and [th]under of Tarḫun and Anzili, with the water, is not going away from us yet, s[o ...] we are not able to go yet. Our knees keep [s]haking, and our heads spin like the [whe]el of a potter, and our cocks are limp!"

Bottom of column iii reached in D.

Y, § 17[7], A iv 3′–10′, I 1′–8′

[...] in [heave]n the clouds [...] from the [powe]rful waters [...] s/he did. Whe[n Anzil]i, the queen of Nineveh thought it good, she sprinkled love, *šaḫi*, and [*parnull*]*i* in the powerful waters, and the love, *š*[*aḫi*], (and) *parnulli* dissolved in the waters. When Ḫedammu tasted the sc[e]nt, the beer, [a sweet] dream seized victorious Ḫedammu, h[is] mental powers. He was dreaming like an ox or an ass. [...] he recognized [no]thing, and he was eating his fill of frogs and lizards.

Y, § 18[7], A iv 11′–19′, I 9′–10′

[Anzil]i began to speak to Ḫedammu, "C[ome] up again, fr[om] the powerful [water]s [...] come straight up, and cutting through the middle." 90,000 [...] pulls ... the place from the earth, and Anzili holds forth [before Ḫedammu her naked limb]s. Ḫedammu (subj.) [...] his manliness springs forth. His manline[ss...]. He impregnates repeatedly [(pl. object) ...] 130 towns [... he] did [X]. And, with his belly/embryo(s) ... 70 towns [...] in ... he finished off [(pl. obj.) ...] heaps of heads he [h]eap[ed] up.

Y, § 19[7], A iv 20′–25′

[...] on the pedestal s/he was struck. Anzili, queen of Nineveh ... in two [...] approached at the feet [of Ḫedam]mu [...], she was going in front of him, [Anzili, queen of Nineveh ...] she [ap]proached, Anzili, while Ḫedammu behind her [...] when/like [...] he keeps pouring out with te[rrifying ...]. Them on the ground, terrifying floods, [...] they do [X]. From the throne, down from the sea he went, Ḫedammu, victorious one [...] away [...] he went.

Y, § 20[7], A iv 26′–30′

[Ḫedamm]u [bega]n [to speak] to Anzili, "Young woman, if to you lov[e ...] lov[e ...] give. Come in the strong [waters ... . Anzili] began to speak in turn [to Ḫeda]mmu. [... (pl. object)] like [...]

Column iv breaks off before paragraph end.

Table 6 presents the preserved paragraphs of Version Y, showing that it could devote no more than 2 columns to the seduction scene, catching up to the final section of version X's narrative preserved in A by its own end. Columns i and ii include the realization a monster has been created, with Ea speaking in assembly to condemn the conflict between Tarḫun and Kumarbi, plotting between the Sea and Kumarbi, and a humorous description of the suffering of humans in a storm caused by Tarḫun's fighting. When Anzili encounters Ḫedammu in i, that is a separate incident from the seduction scene, as suggested above based on narratological parallels from the *Song of Ullikummi*. While the scene in which the goddess prepares herself for the meeting with her victim occurs in column i of X, it can be placed no earlier than column iii of Y. Anzili exposes her lovely limbs to Ḫedammu towards the beginning of column ii of X, but only near the end of iv in Y. Columns iv of both versions mention large numbers, a soothing scent, and the springing forth of Ḫedammu's sex organ, aroused at the sight of the nude goddess.

Given what is preserved of the versions X and Y, one cannot categorically rule out that X picks up near the end of the Y and continues the story, although that would require a fair degree of repetitiousness. But, I suggest that accepting the Hittite versions of the Ḫedammu story are multiform allows for a simpler solution. Certainly the recent studies of the wider story tradition about the Storm-god's battles with chaotic forces show multiformity, as would be expected from a living oral tradition. In previous publications, following up on the work of earlier scholars, I have discussed evidence of variation in the *Song of Gilgameš*, the *Song of Release*, and the *Song of Ullikummi* (Bachvarova 2014; 2016: 39–41, 66–72, 122, 129–30). If my suggestion is accepted, then we would have another example of multiformity in a Hittite song in the Hurro-Hittite song tradition. This is evidence of a Hittite tradition of orally composed narrative song upon which the scribal renditions preserved for us must have drawn, for multiformity is one of the most important characteristics of oral narrative poetry (Lord 1960; Nagy 1996).

Within Hittitology the study of scribes and their activities has deservedly thrived (e.g., Gordin 2015; Torri 2008). The discussion of how scribes reworked texts that present themselves as orally performed, whether rituals (e.g., Miller 2004; Trameri 2011) or prayers (van den Hout 2007), has been remarkably sophisticated, and the question of whether we can see the effects of memorization of an inscribed text as a means of transmission has been tackled (Marcuson/van den Hout 2015). But, surprisingly little effort has been

expended on exploring the exciting possibility that with Hurro-Hittite narrative song we may have an indirect glimpse into the world of orally composed and performed "epic" (long-format narrative song) that is otherwise unavailable to us anywhere else in the ancient world. Haas (2006: 126–127), like others, does note that the "I sing" opening to the songs is explainable by postulating oral performance for the genre, and he suggests it was performed at feasts. He lists a variety of its poetic features, but he does not discuss the features as characteristic of oral poetry. Archi (2007) has been willing to argue for oral composition and performance of the Hurrian versions of the narrative songs, but thinks of the Hittite versions as scribal translations that were recited. Dijkstra (2011: 70) in discussing the tradition of the battle between the Storm-god and the Sea does implicitly refer to oral theory when he speaks of "adaptations and more often even new literary creations with the help of an established, inherited fund of known intrigues, cultural and narrative motifs, epic formulas and poetic forms of speech," but he does not explicitly address the question of a possible Hittite oral tradition. Meanwhile, in von Dassow's (2013) study of the *Song of Release* she explains the inconsistencies between versions of the assembly scene (KBo 32.16 and KBo 32.15) that I have argued are best explained as evidence for multiformity (Bachvarova 2016: 122), rather as the result of a scribal compilation of previously written down passages, fitting with her line of reasoning that the text was used to train scribes. Here she is building on Lorenz and Rieken's (2010) argument that the texts mentioned above tell us about how scribes were trained, rather than about what was performed.

My own work arguing that Hurro-Hittite narrative song is orally derived (Bachvarova 2014; 2016: 35–46) represents the visceral response of a Homerist trained in the Parry-Lord(-Nagy) school of oral poetics to this remarkable group of textualizations. Moreover, it has been in the service of my larger argument that Hurro-Hittite narrative song represents the most closely related extant branch of a Near Eastern bardic tradition that heavily influenced Homeric epic (Bachvarova 2005; 2016); key to this argument is the oral background of the texts, since in order for the tradition to be accessible to illiterate Early Iron Age Greek-speaking bards it would need to have been passed down orally after the fall of the Bronze Age empires and the loss of writing in Greece and most of Anatolia. For the purposes of my own comparative argument, I have only needed to show that there was an oral background to the Hurro-Hittite compositions, and not just the Hurrian versions but also the Hittite ones. I have not needed to explain the relationship between the inscribed tablets and that oral background. Therefore, I have focused primarily on the first step in the process of evaluating an ancient text as described by Reichl (2011: 16):

> "For the discussion of oral literature, the central question is: how can we be sure where to place a text, in the world of oral tradition or of written literature? The methodology developed by Parry and Lord, which goes under the name of 'oral-formulaic theory' or simply 'Oral Theory', offers one possibility of finding the correct answer. As is well-known, the basic logics [*sic*] of this theory consists in first isolating a number of linguistic, stylistic or structural traits typical of oral poetry, then asking whether those traits are found in a given text transmitted in writing (but suspected of oral provenance) and finally classifying this text accordingly."

But, I have not intended to argue that Hittite scribes have simply been taking down from the lips of bards their various versions and played no active role in shaping the texts, as I fear has been assumed by some. In my prior work I have certainly focused on one example that seems to show a collaborative process in which the scribe and the bard worked together to shape the textualization of the Hurrian and Hittite versions of the parables associated with the *Song of Release*, trimming them to fit the space remaining (KBo 32.14, Bachvarova 2014: 94), but I have never intended to argue that the same procedure applied in all cases. Rather, I have emphasized the variety of relationships that can be found among the textualizations of the different songs (Bachvarova 2016: 35).

Indeed, Reichl's (2011: 17) caution bears repeating:

> "[E]ven if a text shows all the signs of orality, there is no guarantee that it actually belongs to an oral milieu. In societies in transition from orality to literacy, literary productions, if not directly imitated from (foreign) written literature, may show the same stylistic traits as native oral works."

Note that when we apply this to the Hittite situation, we must ponder not just whether scribes were inspired to write down mythological compositions analogous to those found in the Mesopotamian scribal tradition,

as suggested by Lorenz and Rieken (2010), but to what degree they were directly imitating Mesopotamian scholarly works, which are attested at Ḫattuša and could have served as models, and to what degree they were drawing on an orally performed tradition with which they were deeply familiar. Moving beyond an "either scribal or oral" hypothesis thus presents interesting lines for further research. Certainly, the very fact that some colophons of Hurro-Hittite narratives include the signatures of their copyists (e.g., *Song of Gilgameš*: KBo 10.47c; *Song of Birth*: KUB 33.120 + KBo 52.10 + KUB 36.31, see Gordin 2011: 183–184 on scribal signatures) speaks to a scholarly milieu for those particular texts' reproduction, and possibly for their original textualizations, but it remains to tease out the meaning of the differences in how different narratives were textualized and copied, which requires us to pay attention, first of all, to the function and milieu of the oral performance of each text, before we move to comparisons with Mesopotamian scribal education, cogent as they are. At a minimum, this is an exercise in aesthetic appreciation of the texts, of "the way in which their existence on the borders of literacy and orality affects the[ir] artistry," as Bradbury (1994: 51) has discussed with regard to Middle English romances. But, it also has the potential of deepening our understanding of the project the Hittite scribes were engaging in, which has given us access to a set of texts unique throughout the Near East, allowing us to hear – though redacted by scribes – the voices of women and other illiterate performers.

In other words, what is needed now is to bring the two strands of analysis together, oral and scribal, in an endeavor analogous to that engaged in by scholars of medieval literature, whose work has strongly influenced my own approach to the Hurro-Hittite material. In this field the 19th-century rigid dichotomies have long since been abandoned, of oral versus written (e.g., Amodio 2005; Doane 2003), classical versus vernacular (e.g., Olsen 2005; Ziolkowski 2005), and high literature versus folklore. Rather, what is spoken of is a continuum from fully oral (no use of writing in the culture) to fully literate, and there is careful parsing of the specific linguistic and socio-economic situation of a culture in order to understand the ideological messages and social constraints shaping the values and decisions of composers, performers, audience members, scribes, and copyists (Foley/Ramey 2011; Reichl 2011). With regard to the material presented to us by Hittite scribes this work has barely begun, despite the careful studies of Archi (2007), Klinger (2001; 2010), and Lorenz/Rieken (2010).

Returning now to the *Song of Ḫedammu*, nearly all the remains are in Hittite, of New Hittite date, and their findspot when known is Temple 1. The most interesting exceptions are the fragment from Kuşsaray and the fragments of a Hurrian textualization, which are of Late New Hittite date and were found in the Haus am Hang.[8] There are two additional fragments of Late New Hittite date (my X.D = KhT's Fr 18 = KBo 26.77, mention of Ḫed[ammu) and one additional fragment from Haus am Hang (KhT's Fr 25 = KBo 26.117, Ḫedammu gobbling up insects). The find spots are consistent with the notion that the *Song of Ḫedammu* was copied as part of the scribal curriculum (Lorenz/Rieken 2010). Yet, we should expect that, like Middle English scribes, Hittite scribes did not follow a single strategy when "re-creating in writing stories that were once orally performed" (Bradbury 1998: 6).

What is notable with regard to the fragments discussed here is that both version X (focused on the seduction scene) and version Y were popular, with at least 3 copies of X and at least 7 of Y. This is not the same situation as that seen with the *Song of Gilgameš*, in which 4 separate tablets show different versions of the final section of the narrative, but the versions do not then continue to be copied in competition with each other (Bachvarova 2014: 90–92; 2016: 69–71). The seduction scene was very much a "purple passage," a regional variant of a popular type scene with antecedents in Mesopotamian Inanna-Dumuzi myth and parallels in other branches of Late Bronze Age Near Eastern mythology.[9] The multiformity found here is consistent with "performance-dependent variability" (Reichl 2011: 25), rather than mouvance, in which scribes make minor replacements to formulaic phrasing. Whereas the latter shows the scribes' deep familiarity with the oral

8 Cf. the discussion of Fr 4 here and Dijkstra (2005). The textualization has been published as KUB 45.62 + KBo 12.80 + 27.180, ChS I/6 Nos. 8, 16 (Salvini/Wegner 2004).

9 See Ayali-Darshan (2015: 26–29) and Dijkstra (2011: 59–60) on the type scene of the goddess offering "erotic assistance." See Leick (1994: 66–89, 258–263) on (attempted) seduction scenes involving Inanna/Ištar.

tradition,[10] the former speaks to audience demand (remembering that the scribe who writes down or copies the version can also be the audience for that version). The variation is more likely the result of two separate textualizations than of a scribe selectively copying sections of a written Vorlage. Strictly speaking, it served no educational benefit to maintain two separate versions of the *Song of Ḫedammu* in the scribal tradition, and yet that occurred. Could the two textualizations belong to different scribal lineages? This is the kind of question that a better understanding of the oral background of Hittite texts can enable us to pose.

Table 1: Conspectus of the chief fragments of the Hittite *Song of Ḫedammu*, outside of versions X and Y.

Fragment numbers	Excavation number	Publication	KhT number	Siegelová's number	Paragraph numbers	Description
1.A	Bo 4205	KUB 33.110	7.A	7	1 §§ 1′–3′	Left side of a column, parts of 3 paragraphs, 2 of which are fairly well preserved.
Provides motivation for Kumarbi to create Ḫedammu. He ruminates on how he is being insulted among the gods (and possibly among humans) and thinks that if he should create a rival to Tarḫun, he would be able to preserve his prestige.						
2.A	Bo 3884 + 1549/u + Bo 7276 + Bo 3135	KUB 33.109 KBo 26.70 KUB 33.94 KUB 8.67	No ed. 6.B 2.A	Not included. 1b, 20 2	i: 2 §§ 2′–3′ iv: 2 §§ 4″–5″	Obverse starts at top left corner of i, comes close to the right edge for some lines, with part of the 2nd paragraph. Reverse is a large chunk of the final paragraph of iv, with left edge, bottom paragraph marker, and part of the colophon.
2.B	Bo 8691	KUB 43.65	6.A	1a	2 §§ 1′–2′	Not a very large part of 2 paragraphs.
i: opens with the scene in which the betrothal of Kumarbi to Šertapšuruḫi is discussed. iv: describes the monstrous appetite of Ḫedammu; the mention of large numbers has parallels with the *Song of Release* (KBo 32.13+). Colophon describes it as "Tablet 2, no[t finished.]" Join of Bo 3135 proposed by Dijkstra (KhT, 2014). Also see Groddek (2016: 142–146).						
3.A	1515/u + E 438	KBo 26.80 KBo 66.108	21.A No ed.	28 Not included.	3 §§ 1′–3′	A medium-sized and a small piece joined together, providing 16 lines spanning 3 paragraphs, with most of the column width preserved in the 3rd paragraph. Top edge has paragraph divider.
3.B	276/v + AO 7573	KBo 57.230 + FHL 25	21.B	Not included.	3 §§ 1′–3′	Two small pieces spanning 3 paragraphs, about 4 signs for each of 12 lines.
This fragment belongs before the scene in which Kumarbi decides to consult with the Sea over the choice of a nurse for his child (Fr 4). Thus, it fits between i and iv of 2.A. It follows the same order of events in *Song of Ullikummi* (1, §§ 8″–9″), in which as soon as Ullikummi is born, he is dandled on his father's knee, then the question of a nurse for him is pondered. Kumarbi goes down to the house of the Sea to meet his son, after rewarding the messenger who reports the event to him. Join proposed by Lorenz (KhT, 2015).						
4.1.A	1690/u	KBo 26.94	26.A	Not included.	ii: 4.1 §§ 1′–3′ iii: 4.1 §§ 4″–6″	Left side of 3 paragraphs of ii and of iii (rather more of iii preserved).
4.2.A	726/v	KBo 26.83	27.A	Not included.	4.2 §§ 1′–3′	Middle section of 3 paragraphs of right column, reaching almost to the right edge of the right column in the middle part.
Kumarbi hopes to set up a location in Nippur where he can discuss the raising of his child with the Sea without being overheard by Anzili in Nineveh or Tarḫun in Kummi. Dijkstra (2005) assigned KBo 26.83 and KBo 26.94 to *Song of Ḫedammu* and has analyzed the Hurrian version (KUB 45.62 + KBo 12.80 + KBo 27.180), which can be used to help fill the gaps of the Hittite version, although it is not exactly the same. Also see Groddek (2016: 146–147). If 4.1 and 4.2 belong to the same tablet, then the right column of 726/v is iii.						
5.A	985/v	KBo 26.82	22.A	29	5 § 1	A medium-sized fragment, including the top edge of a column, extending almost to the left edge, 13 lines.
This fragment has been associated with Fr 2 because of the mention of the town Duddul. It appears to describe the establishment of a sacrifice or festival in the town, perhaps where Ḫedammu is raised (Pecchioli Daddi/Polvani 1990: 133; Polvani 1992: 446–447), just as in the *Song of Birth* (§§ 15′–16′) the birth of Tarḫun is followed by the establishment of a sacrifice. Groddek (2016: 146) notes ll. 1–2 are a (near) duplicate of 2.A i 16–17. This is a frequent speech formula, Kumarbi speaking to his vizier Mukišanu.						
6.A	538/u	KBo 19.112	5.A	5a	6 §§ 3″–4″	Good chunk of the middle of 1 paragraph, first few lines of the next paragraph.
6.B	46/v + Bo 69/354	KBo 19.112A KBo 60.323	5.B No ed.	5b Not included.	6 § 3″	2 small pieces, 6 lines, 3 signs each, per piece.
6.C	Bo 69/826	KBo 26.142	5.C	Not included.	iii: 6 §§ 1′–2′ iv: 6 § 3″	First couple of signs at the left edge of iii (2 paragraphs), ends of the final 8 lines of iv, before colophon.

Table 1: (continued)

Fragment numbers	Excavation number	Publication	KhT number	Siegelová's number	Paragraph numbers	Description
Anzili has learned of the existence of Ḫedammu. She arrives at a god's house, presumably Tarḫun's, too agitated to eat or drink, and warns him that a rival has been created. Ḫedammu's destructive activities are mentioned. The god weeps at the news. For placement of join for B and interpretation of the fragment, see Dijkstra (2005: 322–323), Groddek (2016: 149–153).						
7.A	Bo 4190 (+) 1378/u + 1313/u	KUB 8.64 KBo 26.79	3.A 20.A	3 27	7 §§ 1′–2′ 7 §§ 3″–4″	KBo 26.79: parts of 2 paragraphs, with bottom paragraph marker preserved. KBo 8.64: parts of 2 paragraphs.
7.B	AnAr 96-6-76/ Çorum 1	KBo 26.109/ ABoT 2.17	20.B	Not included.	7 § 1′	KBo 26.109: about 4 signs of 8 lines.
7.C	1721/u	KBo 53.74	No ed.	Not included.	7 §§ 1′–2′	Small piece, 8 lines, including the broken final line of § 1′, with 2–3 signs per line.
Tarḫun has heard that an enemy has come into being and is oppressing the land because of his great appetite. The Storm-god meets with Kumarbi in a hospitable setting to ask about him. Kumarbi apparently is just returning from a visit to the Sea. Siegelová (1971: 37) notes the 2 fragments of A have the same large handwriting. Indirect join proposed on KhT. KBo 26.109 1′–4′ do not seem to match up with KBo 26.79. They begin to coincide at A 5′, B 5′, but see Groddek (2016: 156), who finds a way to merge the two. See Groddek (2016: 156–159) for edition (not including KUB 8.64) and C as duplicate of A.						

Table 2: Conspectus of the fragments making up version X.

Fragment number	Excavation number	Publication number	KhT number	Siegelová's number	Paragraph numbers	Description
A.1	Bo 958	IBoT 2.135	9.B	11b	§§ 1^1–3^1	3 paragraphs, middle paragraph at the widest part, covers about half the width of the column, total 11 lines, with only traces of the 1st line of the 3rd paragraph.
Anzili bathes and ornaments herself. Duplicate passages: B, C.						
A.2	E 26	KBo 65.26	No ed.	Not included.	§§ 5^2–6^2	Small fragment, 7 lines, 3–5 signs each, including the top of a sign from 1st line of a 2nd paragraph.
Mention of Ḫedammu, a head, *w-ar-s[i?* ("soo[the" or "sce[nt"). Is this the moment in which Ḫedammu rears his head out of the water to get a better look at Anzili, who has attracted his attention by her performance? Indirect join proposed by Dijkstra (KhT, 2016). This could belong to either i or ii, before A.4. I arbitrarily assign to i. The placement before A.3 is somewhat arbitrary.						
A.3	Bo 8580	KUB 33.85	10.A	13	§§ 7^3–8^3	A rather small piece straddling 2 paragraphs, 10 lines total, up to 5 signs in width.
Ḫedammu, the Sea, and Šertapšuruḫi are mentioned. Ḫedammu speaks, referring to his mother. Possibly Ḫedammu's first reaction to Anzili, comparing her to his mother? This could belong to either i or ii, before A.4. I arbitrarily assign to i.						
A.4	Bo 5039 + Bo 4161	KUB 33.86 KUB 8.66	8.A	12a 15	ii: §§ 9^4–11^4 iii: §§ 15^6–18^6 iv: just a few signs	Bo 5039 has a piece of both obverse ii and reverse iii. Obverse has left edge of ii, straddles 3 paragraphs, 16 lines, up to 10 signs in width. Reverse has left edge of iii (and a few signs running over from iv on two lines) and straddles 4 paragraphs, although only the last line of the 1st paragraph and the 1st line of the 4th paragraph are preserved, and just barely. At its widest it reaches close to the right edge of the column. Bo 4161 only extant for reverse iii.
ii: Anzili shows Ḫedammu her naked limbs, and he speaks to her, asking who she is. iii: Dialog between Ḫedammu and Anzili. He asks who she is. She begins to intoxicate him. KhT ignores paragraph divider after iii 11″. Signs from iv not included in paragraph count here.

Table 2: (continued)

Fragment number	Excavation number	Publication number	KhT number	Siegelová's number	Paragraph numbers	Description
A.5	Bo 1873 + Bo 69/202 + Bo 8286 + Bo 69/205	KUB 36.57 KBo 26.74	12.A 11.A	17, 18 14	i: 2 signs ii: §§ 12^5–13^5 iii: § 14^5, §§ 16^6–18^6	Bo 1873: a relatively small, long and narrow piece, mostly 1 paragraph, with 2–3 lines of a 2nd paragraph. Bo 69/202 + Bo 8286 + Bo 69/205 is a small piece that contains the bottom paragraph of ii, starting at left edge, which almost reaches the right edge when joined with Bo 1873. Bo 69/205 attaches to the back side of Bo 69/202. Line 2′ of Bo 69/205 joins to 2′ of Bo 1873. Bo 8286 contains 2 signs from bottom paragraph of i extending across line marking right edge of column.
Dialog between Ḫedammu and Anzili. He threatens to eat her. Mention of Nineveh and people. Joinskizze on KhT shows the faces of Bo 1873 flipped in comparison to the KhT transliteration, so iii in the KhT transliteration is our ii and vice-versa. Bo 1873 is not included in KhT's Joinskizze of reverse. The single sign from i of Bo 8286 is not included in the paragraph count here; paragraph count here does not match paragraph count of KhT because the column numbering of Bo 1873 has been flipped.						
A.6	Bo 69/207	KBo 26.75	16.A	23	§§ 19^7–20^7	Small fragment, straddling 2 paragraphs, 8 lines with up to 8 signs each.
Direct speech. Mention of Ḫedammu, a head, a dream not letting go, hazelnut(?, ^{GIŠ}*ḫašikkaš*), something leaping (*watkuzzi*). D iii and E duplicate, D establishing location of A.6 in upper part of A iv.						
A.7	829/v	KBo 19.110	15.A	22	§ 21^8	Small fragment, 6 lines, up to 5 signs preserved.
Direct speech. Mention of Ḫedammu, calling a witness (the Sun-god for an oath?), [*parnull*]*i*, and "powerful [waters]." I place this somewhat arbitrarily after A.6. In X Anzili enchants Ḫedammu with *parnulli* in the "strong waters." In fact, this fragment might go much earlier in the narrative, cf. A.4 iii, § 16, which mentions Anzili intoxicating Ḫedammu.						
B	Bo 4064	KUB 33.88	9.A	11a	§§ 1^1–4^1	Fairly large piece extending across 4 paragraphs, 18 lines, at widest 10 signs, comes close to right edge.
Adds to A, § 1′: in 1st person plural, a proposal to do something; conversation about Ḫedammu, "my sin"; § 3′: Anzili tells her attendants Ninatta and Kulitta to go to the seashore and perform with the *arkammi*-drum and *galgalturi*-cymbals; § 4′: mention of Ninatta and Kulitta.						
C	Bo 69/809	KBo 22.51	9.C	Not included in main edition, but translit on p. 75.	§§ 3^1	Ends of 5 lines, top right corner of a paragraph.
Helps to fill in some words of A, § 3′.						
D	Bo 256 + Bo 4707	KUB 36.95 KUB 36.56	No ed. 8.B	Not included. 8, 12b	ii: §§ 9^4–11^4 iii: §§ 19^7	A piece of obverse, ii and reverse, iii. top right edge of ii, covers 3 paragraphs. On reverse, 1 paragraph of iii at bottom edge of tablet, includes right edge. Bo 4707 joins to bottom right of Bo 256, straddles 2 paragraphs of ii, close to right edge, up to 6 signs across. On reverse a smallish piece of 8 lines, up to 5 signs across, reaches close to right edge
Column iii adds to A mention of mountains, a proposal to sleep, and some phallic imagery: UR$_2$-*si anda* 'in his penis/limb'; ŠU.I-*taran*, ^{GIŠ}*šiyattal*, 'spear'; the latter the subject of *watkuzzi*. Join proposed by Dijkstra (KhT, 2010), with switch of obverse and reverse of Bo 4707. Col. ii, top, duplicates A.4 iii; therefore, D iii, bottom, which duplicates A.6, should correspond to the upper section of A iv. See Dijkstra (2011: 59–65) and Groddek (2016: 154–155) for the join and its significance.

Table 2: (continued)

Fragment number	Excavation number	Publication number	KhT number	Siegelová's number	Paragraph numbers	Description
E	69/974	KBo 26.76	17.A	24	§§ 19^7–20^7	Small fragment of left edge of column, 7 lines, 2–3 signs each, straddling 2 paragraphs.
On this fragment as another duplicate of A.6, see Groddek (2016: 154–155). Adds to A the word *alp*[*u*-, either a reference to clouds (in acc. pl.) or to something pointed (*u*-stem adjective).						

Table 3: Placement of fragments of version X.A by column.

Excavation number	Publication	i	i or ii	ii	iii	iv
Bo 958	IBoT 2.135	x				
E 26	KBo 65.26		x			
Bo 8580	KUB 33.85		x			
Bo 5039	KUB 33.86			x	x	
+Bo 4161	KUB 8.66				x	x (a few signs)
Bo 1873	KUB 36.57			x	x	
+ Bo 69/202	KBo 26.74	x (2 signs)		x		
+ Bo 8286				x		
+ Bo 69/205					x	
Bo 69/207	KBo 26.75					x
829/v	KBo 19.110					x (or earlier?)

Table 4: Schematic depiction of paragraphs of version X.

Paragraph number	A		B	C	D	E
1^1	1	i 1′–4′	rev.? 1′–6′			
2^1		i 5′–10′	rev.? 7′–11′			
3^1		i 11′	rev.? 12′–16′	i 1′–6′		
4^1			rev.? 17′–18′			
Discussion about Ḫedammu. Anzili bathes and ornaments herself. She tells her attendants Ninatta and Kulitta to go to the seashore and perform with the *arkammi*-drum and *galgalturi*-cymbals.						
5^2	2	i 12″–17″				
6^2		i 18″				
Mention of Ḫedammu, a head, *w-ar-s*[*i*? (“soothe” or “scent”?).						
7^3	3	i 19‴–21‴				
8^3		i 22‴–28‴				
Ḫedammu, the Sea, and Šertapšuruḫi are mentioned. Ḫedammu speaks, mentioning his mother.						
9^4	4	ii 1′–5′			ii 1–9	
10^4		ii 6′–10′			ii 10–15	
11^4		ii 11′–16′			ii 16–19	
Description of Anzili’s performance. Anzili shows Ḫedammu her naked limbs, and he speaks to her, asking who she is, appears to threaten her.						
12^5	5	ii 17″–28″				
13^5		ii 29″–33″				
14^5		iii 2′–10′				
Dialogue between Ḫedammu and Anzili. He threatens to eat her. Mention of Nineveh and people.						
15^6	4	iii 11″				
16^6		iii 12″–18″				
17^6		iii 19″–27″				
18^6		iii 28‴				
Dialogue between Ḫedammu and Anzili. He asks who she is. She begins to intoxicate him.						
19^7	6	iv 1′–4′			iii 1′–14′ (bottom edge)	1′–4′
20^7		iv 5′–8′				5′–9′
Anzili seducing Ḫedammu with the scent of hazelnut(?). “In the future a dream will not release us. A spear will leap away from our bodies.”						
21^8	7	iv 9″–14″				
Direct speech. Mention of a witness, [*parnul*]*li* and “powerful [waters].”

Table 5: Conspectus of the fragments of the nine tablets making up version "Y".

Fragment number	Excavation number	Publication number	KhT number	Siegelová's number	Paragraph number	Description
A.1	649/z	KBo 26.72	1.A	4a, 9d	i: §§ 1^1–4^1 ii: §§ 11^3–12^3	Contains a small piece of the middle of the tablet, slightly towards bottom of the obverse? 4 or so signs from left edge of i; 3 paragraphs and the top line of 1 more. 3 signs from right edge of ii; 2 paragraphs.
KhT suggests 649/z, providing obverse, indirectly joins to 392/v+, providing reverse.						
A.2	392/v + 1361/u + Bo 6404 + Bo 10295	KBo 19.109 KBo 109a unpublished KUB 33.84	4.A	16a	iii: § 15^6 iv: §§ 16^7–20^7	Provides 3 lines with 1 sign each from the left side of iii and parts of 5 paragraphs from iv.
B	1109/u + Bo 3386 + Bo 4137	KBo 56.6 KUB 8.65	1.B	Not included. 4b	i: §§ 2^1–4^1 ii: § 14^5	Parts of 3 paragraphs from i, approaching left edge of 3rd paragraph, and a few signs from the left side of ii.
C	Bo 2443 + Bo 969	KUB 33.100 KUB 36.16	1.C	6a	ii/iii: §§ 5^2–7^2	Parts of 3 paragraphs from ii or iii, including the right edge of the 3rd paragraph.
D	Bo 2551	KUB 33.103	1.D	6b, 10	ii: §§ 6^2–7^2 iii: § 13^4	Nearly all of 1st and 2nd paragraph from ii, 7 lines of the bottom of iii.
E	Bo 8548	KUB 33.116	1.E	6e, 9c	ii: § 6^2 iii: §§ 8^3–10^3	A small piece of ii, 8 lines, approximately 2 signs wide. 3 paragraphs of iii. Line count on iii is only tentative because lines at bottom of paragraphs may not reach all the way to the right edge.
F	Bo 4683	KUB 33.122	1.F	9a	ii: §§ 8^3–9^3 iii: § 10^3	Piece of bottom right corner of ii, top right corner of iii.
G	1278/u + Bo 2612 + 553/u + Bo 69/546	KBo 26.71 KUB 12.65 KBo 26.112 unpublished	1.G 28.A	9b Not included. Not included. Not included.	§§ 8^3–11^3	Only iii preserved, the left edge and nearly the whole width of the column. 2 paragraphs are almost fully preserved, with 1 more above (plus the remains of the last line of the previous paragraph) and 1 more below.
Join connecting KhT's 1.G and 28.A suggested by Dijkstra (KhT, 2008). Also see Miller (2007: 135) and Lorenz (2010: 107).						
H	Bo 69/642	KBo 26.73	1.H	9e	§§ 11^3–12^3	Small fragment, 2 paragraphs, 8 lines, up to 8 signs per line. Paragraph marker preserved on top edge.
I	810/z	KBo 19.111	4.B	16b	§§ 17^7–18^7	Parts of 2 paragraphs beginning at the upper edge of the column.

Table 6: Schematic depiction of paragraphs of version "Y".

	A	B	C	D	E	F	G	H	I
1^1	i 1′–6′								
2^1	i 7′–14′	i 1′–8′							
3^1	i 15′–18′	i 9′–14′							
4^1	i 19′–20′	i 15′–27′							
Hospitality scene under the Dark Earth, at Kumarbi's house, food and drink refused. Ḫedammu's appetite discussed. Anzili departs. The sea is mentioned. A character speaks to him/herself. Anzili goes to the sea where Ḫedammu is. [Ḫedammu] sees her.									
5^2			ii/iii 1′–7′						
6^2			ii/iii 8′–16′	ii 1–8	ii 1′–8′				
7^2			ii/iii 17′–26′	ii 9–16					
Ea speaks in the assembly of the gods, pointing out that continued conflict between Tarḫun and Kumarbi destroys the humans who sustain them with offerings.									
8^3					iii 1′–3′	ii 1′–5′	iii 1′		
9^3					iii 4″–8″	ii 6′–9′	iii 2′–4′		
10^3	ii 1′–2′				iii 10‴–14‴	iii 1–9	iii 5′–16′		
11^3	ii 3′–7′						iii 17′–22′	1′–5′	
12^3	ii 8′–10′						iii 23′–24′	6′–8′	
Kumarbi sends Mukišanu to the Sea with a message to come to him. The Sea arrives at Kumarbi's house and they begin a secret discussion.									
13^4				iii 1′–7′					
Humans are reduced to abject fear at the storm brought on by Tarḫun's fighting.									
14^5		ii 1′–7′							
Just 2–3 signs per line. *lē* ("do not") indicates direct speech.									
15^6	iii 1′–4′								
Just the 1st sign from each line.									
16^7	iv 1′–2′								
17^7	iv 3′–10′								1′–8′
18^7	iv 11′–19′								9′–10′
19^7	iv 20′–25′								
20^7	iv 26′–30′								
Anzili works her wiles on Ḫedammu. Mention of "strong waters," a soothing scent. The goddess shows him her naked limbs; "90,000 [...]"; "his manliness springs forth."
