THE ELKUNIRSA MYTH RECONSIDERED

In the year 1953 Heinrich Otten published two studies of a Canaanite myth found among the Boghazköy tablets [1]. The first, entitled *Ein Kanaanäischer Mythus aus Boğazköy,* appeared in M.I.O. 1 ('53), pp. 125-150. In it he provided a transliteration and German translation of the relevant texts, accompanied by philological and historical comments. The second, entitled *Kanaanäische Mythen aus Hattusa-Boğazköy* (sic !), was first read as a paper before the Deutsche Orient-Gesellschaft on March 27, 1952 in Berlin, and was published later in M.D.O.G. 85 ('53), pp. 27-38. Twelve years after Profesor Otten's initial publications the present writer chooses to concentrate his efforts on just a few aspects of the myth. These aspects are : 1) certain lexical difficulties in the text, and 2) the question of the survival of the distinctively Semitic *parallelismus membrorum* [2].

The lexical contributions can best be handled in connection with a fresh, English translation of the myth. The *dramatis personae* — familiar from the Ugaritic texts [3] — are the god El (in this myth called Elkunirsa [4]), his wife the goddess Asherah [5], the storm

---

1. For a listing of the cuneiform texts which constitute this myth, see Otten in M.I.O. 1 (1953), pp. 125 ff., and Laroche, *Catalogue,* entry 231.

2. Otten noted in M.I.O. 1 (1953), p. 145 : "Dennoch gestattet auch die Ungunst der Überlieferung das Urteil, dass vom semitischen parallelismus membrorum sich keine Spur findet."

3. Compare the convenient English translations in Pritchard, *Ancient Near Eastern Texts,* on pages 129-155 (translations by H. L. Ginsberg).

4. The Hurro-Hittite spelling of West Semitic *'l qn 'rṣ,* "El, creator of earth". See Otten's remarks in M.I.O. 1, pp. 38-39, and M.D.O.G. 85, pp. 31-32. The name also occurs in the abbreviated form dKunirša. For further occurrences of the West Semitic title see Donner & Rölling, *Kanaanäische und Aramäische Inschriften,* Band II, p. 43. Most recently see also M. Astour, *Hellenosemitica,*

Persée BY: creative commons

god Baal [6], and a young goddess who helps Baal and who probably represents a fusion of the goddesses Anat and Astarte (name written dIŠTAR) [7]. To be sure, as Professor Otten has observed to me in a private communication, because of the fragmentary nature of our present texts, the sequence of events as reconstructed here and in his own articles is nothing more than an assumption. But then some order must be assumed, and the sequence as presented in 1953 by Otten will be retained here arbitrarily.

[" 'Get behind me, a]nd [I'll get behin]d you ! [8] With [my] word [I] will *press* [9] [you !] With [my] spindle [10] I will *pierce* [11] [you !] [With...] I will *stir* you *up* !' [12] Baal heard (this) [and ? ar]ose.

---

pp. 206 ff., who adds most interesting comparative data from the Cadmus cycle.

5. In this myth spelled either d*A-še-er-du-uš* with Hittite declensional endings or in one of several Akkadianized forms, d*A-še-er-tum* or *ŠA* d*A-še-er-ti.*

6. Here always written dU with Hittite phonetic complements. See Otten, M.I.O. 1, p. 144 and M.D.O.G. 85, p. 34. In this article it has been decided to refer to him by his Canaanite name Baal despite the fact that it is never represented in the orthography of this version. The same procedure has been followed for Asherah (instead of Asherdu) and Anat-Astarte (instead of Ishtar).

7. *Ibid.*

8. One is faced in interpreting any of the following difficult phrases with the choice of understanding them as erotic propositions or violent threats. In the Ugaritic myths there are examples of both approaches. In the Aqhat tale Anat first wheedles (2 AQHT vi 17-19 : "Hearken, I pray thee, [Aqhat the Youth ! A]sk for silver, and I'll give it thee ; [For gold, and I'll be]stow't on thee" ; A.N.E.T., p. 151 b) and then, when refused, resorts to threats (2 AQHT vi 42-45 : "Give heed *to* me, Aqhat the Youth, Give heed to me for thine own good. [...] I'll meet thee in the path of arrogance, [Encounter thee] in the path of presumption, Hurl thee down at [my feet *and trample*] thee, My darling great big he-man !", A.N.E.T., p. 152 a). I have chosen the latter as the more probable, since the words of Asherah are spoken *after* Baal has rejected her proposition.

9. GAM-*ta ta-ma-aš-*[*mi*]. The verb *damaš-*, when associated with the preverb *katta,* has the meaning "*niederdrücken*" according to HWb, p. 207.

Of the few interesting examples of *katta damaš-* of which I am aware one should note: KUB XVII 1 vs ii 6, where the boulder falls from heaven and *crushes* the attendants and a man of god; KUB XVIII 63 vs i 20-23, *nu ma-a-an u-ni-uš-pát wa-aš-ku-uš nam-ma-ma-ká*[*n*] (21) DINGIR-*LUM* ŠÀ É DINGIR-*LIM da-ma-a-in wa-aš-ku-in* (22) *UL ku-in-ki uš-ki-ši* LÚ.MEŠ ME.SAG-[*š*]*a-ma-aš-kán* (23) ZI-*za* GAM *UL ku-it-ki da-ma-aš-ša-an har-kán-zi.* "If (it is) only yon sin, and furthermore if you, O god, see no other sin inside of the temple, if the ME.SAG-men have in no respect *oppressed* you (plur.!) in spirit. ...". See also Alalakh Tablet 454 ii 22: "Two tables (in ?) the temple they have *broken down* (GAM *dam-me-eš-ši-ir*), and they are ruined". A.T. 454 iv 25-26 [*-a*]*h-ha-an-nu-wa IŠ-TU* GIŠ*MU-ÚR-TI* GIŠBAL GIŠ*ḫa-x* [ ] [GAM *dam-me-eš-ši-ir nu-wa-*]*ra-at har-ak-ta,* "They exerted pressure on a [ ]*annu* with a GIŠ*murti,* a spindle (?), and a GIŠ*ha*[ ], and it was ruined". All of these references confirm the basic notion of pressing down upon something, so as to crush or ruin. But they do not ultimately solve the problem of the meaning of "I will press you down with my word".

10. Otten restores [GIŠB]AL.TUR, and there is no reason to doubt this restoration. The Hittite reading is presumably *hulaliyaz* from the base form (GIŠ)*hulali-* (HWb, p. 73; Sommer-Ehelolf, *Papanikri,* p. 72). The spindle and the mirror are often singled out in Hittite texts as the characteristic habit of women (KBo II 9 i 28 and KBo VI 34 ii 42, 53). A stela from Mar'ash (A.N.E.P., N° 631) shows two women holding mirrors and spindles. According to the Azitawadd inscription, women could stroll in safety throughout the highways of his realm, holding their spindles (Karatepe Phoenician inscription, A II 6; Donner & Röllig, II, p. 41). As for the goddess Asherah's spindle, Ugaritic Text 51 : II : 3-4 clearly mentions a *plk* held by the goddess (cf. M. ASTOUR, *Hellenosemitica,* p. 207, fn. 3).

11. The meaning "pierce" for the verb *hat(ta)rai-* has been rightly questioned by Laroche (*Gedenkschrift P. Kretschmer,* II, 3), but I am at a loss to suggest something more fitting for this passage. I retain, therefore, Otten's tentative translation, which still seems to sound best.

12. One expects an instrumental phrase in the lacuna analogous to "with my word... with my spindle..." above. The verb *ninink-* means basically "to rouse, stir up; muster (troops)". In view of the fact that this is a threat rather than a proposition, I do not favor "to rouse someone (sexually)". If we could assume some contamination with the near homograph *nink-* (Va) "to drink oneself drunk", there might be an allusion to the cannibalistic and vampire -like traits of Anat, brought to light recently in the Ugaritic text discussed by M. Astour, in *Revue de l'histoire des religions,* CLXIV (1963), pp. 1 ff., and even more recently in his *Hellenosemitica,* p. 180 f.

He ca[me] to the source[13] of the Euphrates[14]; he ca[me] to Elkunirsa, the husband of Asherah. He entered the tent[15] of Elkunirsa.

["Elkun]irsa saw Baal and asked him: ['Why] have you come ?' Baal replied: 'When I came to you and into your house, Asherah sent (her) maidens to me (saying): "Come, sleep with me !"[16] [And when] I refused, she *threatened*[17] me. [Thu]s she said: "Get behind me, [and] I'll get behind you ! With my [word] I will *press* you ! With my [spindle I will *pierc*]*e* you !" This is why I have come, my father[18]. [...] I did [no]t come to you, (but now) I [have come] to you in person, (for) [Asherah] is impugning[19] your virility, [and although she is] your [wi]fe, she keeps on[20] sending to me. [... '] Elkunirsa [began to say] to Baal: 'Go, sleep with her ! [Lie with[21]] my [wi]fe and humble her !'

---

13. Hittite *haršumna-* "spring, source, deep" is discussed by Otten, M.I.O. 1, p. 126 ff., Laroche, R.A. 48, p. 220, and Goetze, J.A.O.S. 74, p. 189.

14. Hittite ÍD*Mala* = *Euphrates* is supported by the recent Hattusili I bilingual in KBo X (see M.D.O.G. 91, p. 83, fn. 28).

15. giš*ZA.LAM.GAR* (= Akkad. *kultarum* or *zaratum*). Here it corresponds to Ugaritic *qrš* rather than *ahl*, and denotes El's trellissed arbor (Gordon, *Ugar. Man.* Glossary entry 1725).

16. The similarity of the plot at this point to the biblical story of Joseph and Potiphar's wife was already indicated by Hrozný in an article composed around 1929 for the *Encyclopedia Britannica* (cited by Otten in M.I.O. 1, p. 148).

17. To my knowledge this is the only attestation of the verb *halanza-*, so that the meaning must be conjectured from the present context.

18. The fact that Baal is called *bn dgn* rather than *bn 'l* in the Ras Shamra tablets should not force us to weaken the sense of "my father" here. Compare again Astour, *op. cit.*, p. 207, fn. 1.

19. The verb is *markiya-* construed with the reflexive particle *-za* (HWb, p. 137 with literature cited there). The elderly El has become so senile that his wife mocks his virility and gives herself to the young and virile Baal. El's ability or lack of ability to perform sexually is the issue and provides the suspense for Ugaritic Text N° 52. There, as apparently in our present myth, El comes through at last and demonstrates his ability to consummate a sexual union with his wife (or wives).

20. The form *wiškizzi* is an iterative (Friedrich, *Heth. Elem.*, par. 141).

21. One expects in this lacuna a *parallelismus membrorum* for *šaššumai*.

["So Baal] hearkened to the [wo]rd of Elkunirsa and [went] to Asherah. Baal spoke to Asherah : 'I have killed seventy-seven of yo[ur children], (yea) eighty-eight have I slain' [22]. Asherah heard [this h]umiliating report and was grieved in her mind [23]. She appointed [lame]nting women [24] and she [began] to lame[nt] for seven years [25]. [ ] They eat and drink [26]. [...]"

If our order of fragments is correct, in the period which intervenes between the end of the foregoing tablet and the beginning of the following fragment [27] a reconciliation of Elkunirsa and Asherah seems to have taken place. In what follows the two of them plot against Baal, while the latter receives help from Anat.

Furthermore, the verb *luriyah-* "to humble" probably reflects Canaanite *ʿny,* which so often in the Old Testament (ענה in Piel) refers to the mastery which the male manifests over the female in the sexual act (Gen. 34 : 3 ; Deut. 21 : 14). However, in the present context this meaning is modified by the inclusion of the idea of the humiliating *(luriyatar)* of the death of Asherah's children.

22. Note here the familiar numerical ascension which is so common in West Semitic poetry. The number "seventy-seven" is not, however, idly chosen by the poet, since we know from the Ugaritic texts that Asherah was the mother of all the gods, which number (conventionally) "seventy" (compare C. H. Gordon in S.N. Kramer, *Mythologies of the Ancient World,* p. 196).

23. Normalized text : *nu-ši-kan ištanza anda idalawešta,* "and within her the mind was sorrowful"

24. The SAL.MEŠ *taptaruš* (see Laroche, O.L.Z. 1956, p. 420 ; Otten, *Totenrit., passim*) are Hittite equivalents to the Ugaritic *mšspdt* and *bkyt* of the Aqhat tale.

25. A seven year period of lamentation for the death of a hero is familiar from the Ugaritic tale of Aqhat, where Aqhat's father Daniel appoints wailing women *(mšspdt)* to mourn for his son for seven years (A.N.E.T., p. 155 ; I AQHT 170-185).

26. Professor Otten informs me that he believes this to refer to the funerary meal in which the *taptara-* women take part (see also his *Totenrituale,* pp. 13, 67). Accordingly, this passage can have nothing to do with a seven-year drought or famine the effects of which are suffered by both gods and men !

27. Combination of KUB XII 61 III and KUB XXXI 118 + KUB XXXVI 37 ; see Laroche, *Catalogue,* entry 231.

"[Asherah replied to Elkunirsa : 'If you..., then] I will [he]arken to m[y...,] and I will sleep with you.' [Elkunirsa] heard [this word] and said to his wife : 'Come, [I will hand over [28]] Baal to you. As it pleases you, [punish (?) [29]] him !'

"Anat-Astarte heard those words. She turned herself into an *owl* [30] on Elkunir[sa's] *arm* [31], (yea) she became a *screech-owl* [32] [...] and perched on his *shoulder* [33]. (There) she overhears the words which the husband and wife speak to each other. Elkunirsa and his wife came to her bed and slept with each other. But Anat-Astarte like a bird flew off across the desert places [34]. In the desert places she found Baal, and [she said] to him [...]" (Rest of the myth not preserved).

---

28. Some Hittite expression with roughly this meaning should be presumed. For the situation (El handing over Baal to a foe) compare Ugaritic Text 137, lines 36 ff., A.N.E.T., p. 130 b.

29. The meaning must be this. I do not, however, have a suggestion for restoring the verb, which apparently begins with *la*[ ].

30. Text : GAL-*iš* DÙ-*at* (= Hittite : *zeriš iyat* ; for Hitt. *zeri-* = GAL, see Otten, O.L.Z. 1962, Nr. 7/8, Col. 441, note 1 ; B. Rosenkranz, *Orientalia* 1964, p. 251 ; Güterbock, R.H.A. 74, pp. 97-98).

31. Text : ŠU-*i* (= Hittite : *keššari*) "on (his) hand". However, Canaanite *yd* often denoted more of the arm than just from the wrist down. Hence, we may allow some freedom here.

32. See Otten, M.I.O. 1, pp. 142-3, fn. 59.

33. Text : *ku-ut-ti-iš*(!)-*ši*, normalized as *kutti-ši*, means literally "on his wall". K. Riemschneider has suggested an interpretation for this apparently awkward expression. He visualizes something like Nestor's cup with a handle attachment in the shape of a bird perched on "its (the cup's) wall (i.e., rim)". I am indebted to Otten for passing this interesting suggestion on to me. I personally prefer an emendation of the text, presuming a scribal error of *ku-ut-ti-iš*(!)-*ši* for *ku-ut-ta-ni-iš-ši* "on his shoulder". This yields the parallelism "on his hand/arm... on his shoulder".

34. Laroche has shown (R.A. 48, p. 220) that this clause should be reconstructed as above. The form *huriptaš* is accordingly Dative plural of a noun *huripṭ-*. In view of both the phonetic aptness of the equation and the suitability to the context I propose that Hittite *huripṭ-* is a loan word from Akkadian *ḫuribtu*, meaning "desert, steppe" (AHW, p. 359 a). Anat is still in the form of a bird (presumably the same bird ?) ; and the owl is known

Otten has correctly observed [35] that there are few, if indeed any, traces of the distinctively Semitic *parallelismus membrorum* in this Hittite version of the originally West Semitic myth. He has surmised (I believe correctly) that these had been lost in the course of oral and/or written transmission. We cannot be certain about the number or nature of the stages of transmission through which the myth passed. But Otten has observed that certain characteristics of the present version indicate that at least one stage in the process was an Akkadian one [36]. He has noted also that it is very likely that the Hurrians played a part in the process [37]. Assuming then that the original Semitic parallelisms were not appreciated by the non-Semitic traditor and were consequently distorted or otherwise obscured in translation, is it not possible for us to detect — even in this present version — traces of these original parallelisms ? The present writer is convinced that such is the case. He firmly believes that at least one [38] plausible example

---

to have haunted the steppes and deserted places in the ancient Near East (compare for example Psalm 102 : 7, where it is called צִפּוֹר חֳרָבוֹת). Hittite nouns ending in *-pt-* are rare *(kupti-, tunnaptu-)*, whereas nouns ending in consonantal clusters of which *t* is the second member are common in Akkadian, the *t* in such cases representing the feminine singular morpheme.

35. See footnote 2 above.

36. M.I.O. 1, pp. 145-6 ; the use of *UMMA...-MA*, the spelling dA.NUN.-NA.GÉ, and the use of the ideogram giš BAL.TUR for "spindle".

37. M.I.O. 1, p. 146.

38. Other possible examples are :

KUB XXXVI 35 i 1-3 :

["Get behind me,]
[An]d I'll ge[t behind] you !
With [my word] I will *pres*[*s*] you !
With [my sp]indle I will *pierce* you !"

KUB XXXVI 35 i 20-21 :

"Go, sleep with her !
[Lie with] my [wi]fe,
and humble her !"

KUB XXXVI 35 i 24 :

"I have killed seventy-seven of you[r children !]
(Yea) Eighty-eight have I slain !"

can be adduced, which incidently also solves several difficulties of interpretation in the immediate context.

What follows is a transliteration of the text as reconstituted from KUB XII 61 III and KUB XXXI 118 + XXXVI 37 II :

(6) ^{d}*IŠTAR-iš e-ni* INIM^{MEŠ} *IŠ-ME na-aš-za-kán A-NA* ^{d}*El-ku-ni-*[*ir-ša*]

(7) ŠU-*i an-da* GAL-*iš* DÙ-*at ḫa-pu-pé-eš-ma-za ki-ša-at*

(8) *na-aš-za-kán ku-ut-ti-iš*(!)-*ši e-ša-at*

Otten translated this : "Ishtar hörte jene Worte und in Elkunirsa's (?) Hand wurde sie zum Becher, wurde sie zum... Vogel" [39]. In his footnotes 58 and 59 he explained that the Sumerogram GAL could mean either "goblet" or "large, great" (= Hittite *šalliš*), but that he preferred the former interpretation for grammatical considerations [40]. He noted also that a two-fold transformation of the goddess — once into a goblet and a second time into a bird — was striking *(auffällig)*, but not enough to deter him from the translation. The use of leaders in his translation indicated his uncertainty as to the precise identification of the *hapupi*-bird. In his foot-note 50 he cited extensive evidence [41] in favor of "owl", but then finally deferred from translating

39. M.I.O. 1, p. 142.

40. M.I.O. 1, p. 142, fn. 58.

41. To which it is nevertheless possible now to add two more occurrences not cited by Otten in M.I.O. 1. One of these (KBo IX 119 rs iv 9-11 ; List VII in Table I) is now published ; the other (1847/u II + 6-7 ; List VI in Table I) was kindly communicated to me by Professor Otten. Some of the occurrences (ABoT 7 + = Cat. 433 : 6 I 1-6 and 264/i IV x + 2-3') are not listings of birds. Those which represent such listings, albeit only fragments, are included in my Table I, where positions in the normal sequence are assigned numerically in the left-hand margin. The same general sequence of ÁMUSEN, SÚR. DÙ.AMUŠEN, *hapupi-*, and MUŠEN *HUR-RI* is discernible in them all. List VII alone adds something new. In it there are a few additional entries : *I-RI-BU*MUŠEN "crow" (?) in position 3, and *šu-ra-šu-ra-an*MUŠEN and [ ]*ip-ri-ti-in*MUŠEN in positions 6 and 7. Comparison of Labat's list cited by Otten in M.I.O. 1, p. 143, note 59 : *ŠURDŪ, ZĪBU, ARIBU,* MUŠEN *HUR-RI, SUMMATU,* with List VII would seem to suggest not *hapupi-* = *SUMMATU,* but rather *hapupi-* = *ZĪBU,* and *šurašura-* = *SUMMATU* ! C.A.D., Vol. 21, p. 106 defines *zibu* B as "vulture", which

it "Eule" in view of the possibility that the bird was a dove and in view of the consideration that an owl would have been conspicuous inside a house, whereas a dove would not.

My approach to the passage, though profiting greatly from Professor Otten's remarks, is slightly different : 1) No matter how long the *Überlieferungsgeschichte* has been, one must ever be alert for traces of the *parallelismus membrorum* of the original Canaanite version. 2) Since the myth has passed through the hands of Hurrians and Hittites, who were not familiar with this stylistic device, it is likely that such passages were distorted. 3) The passage before us exhibits (even in its present form) unmistakable traces of such parallelistic structure. If we be permitted to assume a scribal error of *kuttani-ši* for *kutti-ši,* as argued in foot-note 33 (granted that such an assumption is preferring the *lectio facilior,* as Laroche has pointed out to me), a neat parallelism emerges which we can almost reconstruct in its original Canaanite form as *ʿl ydh...ʿl ṯkmh* [42]. One would look, then, for some originally parallel sense for the clauses dealing with Anat's metamorphosis. After all, Otten has correctly observed that a double transformation would defeat the purpose of the goddess — namely, to escape notice ! And since there is no reason to suspect confusion in the *hapupi-* clause, whereas the GAL-*iš* DŪ-*at* was admittedly obscure, it is precisely here that we should seek a distortion in transmission. Now it happens that a very common West Semitic noun (Akkadian too ! [43]) denoting a goblet is *ks,* vocalized *kâsu* or *kûsu* in cuneiform [44], and pronounced **kâs(u/i/a)* or **kôs(u/i/a),* depending upon the specific West Semitic language in which the term

---

would harmonize with the theory of GAL = *ks* only if we interpret *ks* (and Heb. כוס ?) as "vulture". At any rate, this latter comparison would seem to cast doubt on the equation of *hapupi-* = *SUMMATU* = "dove", and perhaps suggest the meaning "dove" for Hittite *šurašura-*. This leaves Hittite *hapupi-* as the designation of a bird of prey, either an owl or (less probably) a vulture.

42. Spelled according to the conventions of Ugaritic.

43. AHW, p. 454 b ; see also most recently Güterbock, R.H.A. 74, pp. 97-98.

44. See Güterbock, *loc. cit.*

appears and the relationship of that language to the so-called "Canaanite shift" of etymologically long *a* to "long" *o* [45]. It happens also that there is a homonym to this noun, which also occurs in several Semitic languages, and which means "owl" [46]. Could it be that at some point in the chain of tradition (whether written or oral) a traditor who did not understand the stylistic device of *parallelismus membrorum* and was unfamiliar with the rare bird name *ks* understood it in its more common meaning of "goblet" ? [47] If so, the ideogram GAL would have been the logical choice to express this idea, as Güterbock has demonstrated, for the Akkadian and Syrian equivalents to Hittite GAL are precisely *kâsu* and *kûsu* respectively [48].

ADDENDUM

During the last month through the kindness of Prof. H. Otten there have reached me several further unpublished references to the *hapupi-* bird, which might be of interest to the reader.

Through the courtesy of the editor, Prof. Laroche, I include them here. Unpublished text 264/i IV x+2f (apparently part of a description of the AN.TAH.ŠUM festival) has: *nu ha-pu-pu*[*-un*MUŠEN *da-an-zi nu* DINGIR-*LAM*] É^{MEŠ} DINGIR^{MEŠ}-*ya* [*wa-ah-nu-wa-an-zi*]. The above restoration (not proposed to me by Prof. Otten) is based upon the strikingly similar passage in ABoT 7 + (= Cat. 433, 6), Col. I, lines 4-6. In both texts the bird name exhibits a *u*-theme vowel *(hapupu-)*. The second unpublished text communicated to me by Prof. Otten is Bo 620, which (although not a list of birds in the manner of the eight texts utilized for my chart) contains several bird names, including: SÚR.DÙ.A^{MUŠEN} (rev 13', 15'), MUŠEN *HUR-RI* (rev 18'), *ha-pu-pí-in*^{MUŠEN} (rev 18'), and a new bird name *kipriti-* (Nc). In Bo 620 the latter occurs in the following

Hittite Bird-List.

List IV	List V	List VI	List VII

Vs ? 3' ; List V = 456/e IV 22' ; List VI = 1847/u II x + 6-7 ; List VII = KBo IX 119 rs iv 9-11.

forms : *ki-ip-ri-ti-i*[*n*] (rev 9'), *ki-ip-ri-ti-in* (rev 18'), and *ki-ip-ri-ta-aš* (rev 20'). This bird name is clearly to be restored in KBo IX 119 rev iv 11 (my List VII), where we should read [*ki-*]*ip-ri-ti-in*^{M}[^{UŠEN}]. Although Bo 620 is not the same kind of list as KBo IX 119, it is worth noting that the order of birds mentioned is approximately the same : *hapupi-,* MUŠEN *HUR-RI,* and *kipriti-*. The forme *kipritaš* is probably a genitive singular of an *i*-stem noun (of the type *hulugannaš,* from *hulukanni-* ; cf. Friedrich, *Elem.*[2], par. 66) rather than evidence for variability in the theme vowel. The new evidence, though quite interesting, sheds no further light on the precise identification of the *hapupi-* bird.
